EXPERIENCE

Conversation Design Senior

Salesforce | Mar 2021 - Present

- Own conversation design process from concept to launch: analyze data and customer interactions with product; write prompts that adhere to Salesforce's core tone of voice, while iterating based on feedback
- Create and maintain 15 bot templates for Customer C360, Easy and Salesforce Industries bots, that incorporate Salesforce resources into engaging chatbot flows
- Integrate Salesforce and Slack apps via NLP, workflows and webhooks
- Lead the inclusive training data project, leveraging sociolinguistic research methodology to ethically and responsibly collect diverse data, increasing the varieties of English that Einstein bot can understand, thereby improving the customer experience
- Partner with product owners, engineering, A11y, localization, globalization, data science teams, to create create a vision for a unified conversational experience across the Salesforce product suite
- Align strategies, creating conversation flow prototypes in Figma and Botsociety and present to multiple stakeholders

Conversation Design Lead

Adobe | Aug 2020 - Dec 2020

- Created and maintained Social Automation Playbook and conversation guidelines, and monitored product team adoption
- Audited, analyzed, recommended, and implemented consistency improvements for proactive content across surfaces
- Partnered with localization experts to develop language-specific Twitter & Facebook bot experiences

Content Engineer

Verizon Media (formerly Yahoo!) | Nov 2015 - Jul 2020

- Led conversation design efforts for NLP in Yahoo's flagship chatbot offering, Monkey Pets
- Created information architecture, conducted reviews and testing, advocating to engineering and product on behalf of users to create a natural conversational experience
- Produced and wrote content for web/mobile products, with a focus on weather, travel, search, sports and entertainment apps and chatbots
